Revision History

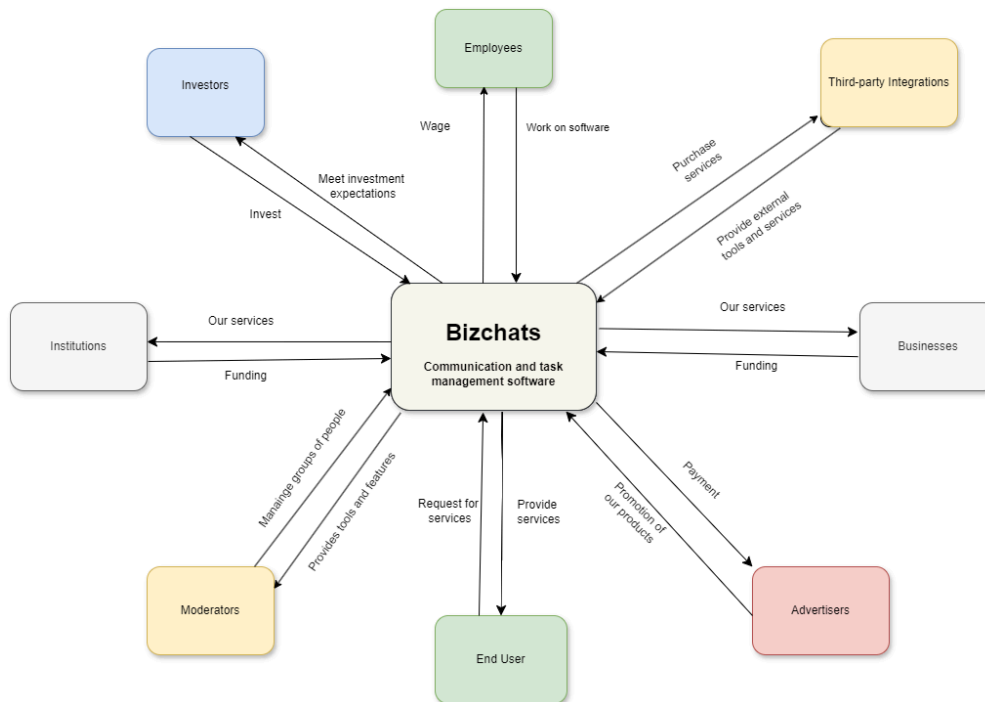

Version Number	Revision Date	Summary of Changes	Modified by

[Note: It is recommended that drafts be numbered 0.1 to 0.9, and that the first approved version be numbered 1.0. Thereafter, new version numbers will depend upon changes: 1.01, 1.1, etc for minor updates, 2.0, 3.0 etc for major changes.]

TABLE OF CONTENTS

1.	<i>BUSINESS CONTEXT DIAGRAM</i>	4
2.	<i>REQUIREMENTS SCOPE STATEMENTS</i>	5
3.	<i>HIGH LEVEL BUSINESS REQUIREMENTS SIGN-OFF</i>	5

1. Business Context Diagram

Requirement Scope Area	Description
Website Creation and Development	The scope involves designing and developing a user-friendly website for BizChats, integrating user accounts and a seamless experience. Features include user authentication, live chatting and document management.
App development and creation	The scope involves creating a mobile app that is optimized for mobile devices. It will have all the features the website will and it will share the same database ensuring you can access from both your phone and website.
Software launch	This scope involves publishing and putting both the website and app on the cloud including the database and backend. It includes creating virtual machines, databases and having the app on the google play store and apple app store.

External Entity	Description
Zoom/Google Meet	It is a video chat app with features, such as recording your lectures and/or meetings, collaborate on a whiteboard, enhanced note taking, https://www.zoom.com/en/products/collaboration-tools/features/?cms_guid=false&lang=en-US
Google Recaptcha	Authentication service for users when they sign/log in. This will limit bots on our software.
AWS Cloud Storage	AWS cloud storage or S3 bucket is a place where we will store all the documents. It is very secure and can help hold thousands of storage.

Information Flows	Description
BizChats to End Users and Back	Users send tasks, messages, and documents to BizChats, which processes requests and returns updates via web or mobile.
External Communication with Third-Party Tools	BizChats integrates Zoom/Google Meet for meeting scheduling, exchanging data like meeting links and times between platforms.
Document Management via AWS Cloud Storage	Users upload and access documents through AWS S3, enabling secure and scalable cloud storage integrated with BizChats
Authentication with Google Recaptcha	BizChats uses Google Recaptcha to verify users during login/signup, preventing bots and ensuring secure platform access.

2. Requirements Scope Statements
