Gayathri Dhathsha M

Talent Acquisition Specialist
Tata Consultancy Services (TCS)
Toronto, ON

Subject: Application for Full Stack Developer Position

Dear **Ms. Dhathsha**,

I am excited to apply for the **Full Stack Developer** position at **Tata Consultancy Services (TCS)**. With experience in **Python, Java, React, and SQL**, I am eager to bring my technical skills and problem-solving abilities to your team. TCS's commitment to innovation and excellence in software development strongly aligns with my passion for building scalable and efficient applications.

I am completing an **Advanced Diploma in Computer Programming and Analysis** at **George Brown College** (April 2025) and have developed hands-on experience in **full-stack development, cloud technologies, and Agile methodologies**. My expertise includes:

- **Developing and maintaining full-stack applications** using **React, Node.js, Python, and SQL**.
- **Building cloud-based solutions** with **Azure and AWS**, ensuring scalable and secure architectures.
- **Collaborating in Agile teams** to design, implement, and deploy high-quality software solutions.
- **Optimizing databases and writing efficient queries** for performance-driven applications.

I am particularly drawn to this role because of TCS's focus on **cloud-based development, microservices, and enterprise solutions**. My experience working on **real-world projects**—including a **role-based employee management system** and a **real-time communication platform**—has equipped me with the skills to contribute effectively to your team.

I welcome the opportunity to further discuss how my skills align with your needs. Thank you for your time and consideration.

Best regards,

Fahad Al-Hadeethi
